

Peripherally Inserted Central Catheter (PICC) Post Removal Instructions

Simple instructions to follow after the removal of your PICC line are as follows:

1. Clean with soap and water everyday during your bath or shower.
2. Apply triple antibiotic ointment and a fresh band aid every day until scab forms at the site.
3. After scab forms, leave the site open to air.
4. Call your physician for signs of infection
 - Redness
 - Swelling
 - Drainage
